Introduction

The Hospital In-Patient Enquiry (HIPE) scheme is a health information system designed to collect clinical and administrative data on discharges from, and deaths in, acute hospitals in Ireland.¹ It is the principal source of national data on discharges from acute hospitals. The Healthcare Pricing Office (HPO) oversees the administration and management of this scheme, including the development and support of the data collection and reporting software, training of coders and data quality audit, reporting, and responding to requests for data.² The figure below summarises the HIPE data collection and reporting process. Further information on the development of the HIPE scheme can be found in our annual report series.³

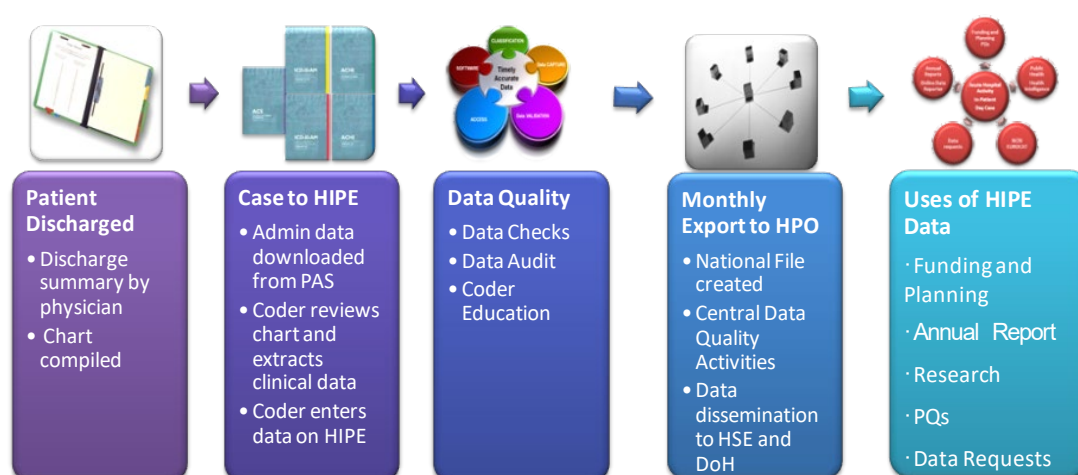

Figure: The HIPE Data Collection and Reporting Process

¹ The Hospital In-Patient Enquiry (HIPE) scheme was established in 1971 by the Health Research Board (HRB). Between 1990 and 2013 the Economic and Social Research Institute (ESRI) oversaw the administration and management of this scheme on behalf of the Health Service Executive (HSE) and the Department of Health (DoH). From January 1, 2014 the National Casemix Programme and the Health Research and Information Division at the ESRI became the Healthcare Pricing Office (HPO). This Office has responsibility for the HIPE scheme. While the HPO will initially be established on an administrative basis, in the HSE, it is planned that this Office will ultimately be established on a statutory basis. This development is in line with the proposals in the 'Money Follows the Patient' policy paper published by the Department of Health in February 2013.

² The HPO also has responsibility for the National Perinatal Reporting System (NPRS). Between 1999 and 2013 the ESRI oversaw the administration and management of this system on behalf of the HSE and the DoH.

³ HIPE Annual Reports can be found on www.hpo.ie

Objectives of HIPE Data Dictionary Version 15.0

HIPE collects information on in-patient and day patient activity from participating hospitals. A HIPE discharge record is created when a patient is discharged from (or dies in) hospital. This record contains administrative, demographic and clinical information for a discrete episode of care. An episode of care begins at admission to hospital, as a day or in-patient, and ends at discharge from (or death in) that hospital.

This dictionary provides definitions and codes for data collected within HIPE as of 2023. It provides standard definitions for variables with the objective of ensuring that consistency and data quality are maintained. It is also hoped that the dictionary will be of use to researchers, clinicians and hospital management in understanding and analysing HIPE data.

Using the Data Dictionary

The HIPE Data Dictionary provides information on the variables collected by HIPE.⁴ Internal variables relating to data quality and the HIPE database structure are not included. Other exclusions from the HIPE Data Dictionary Version 15.0 are data and non-HIPE cases collected through the HIPE system but not included in the national file.⁵

All variables are listed alphabetically and an alphabetic index is included in the table of contents. The code sets used for variables are listed in [Appendix I](#) and can be accessed via hyperlinks. [Appendix II](#) provides the ASCII file name for all variables. For information on the classifications for diagnoses and procedures and the Casemix classification and grouping software see [Appendix III](#).

A glossary of abbreviations is provided in [Appendix IV](#) and hyperlinks to source documents and organisations are provided in [Appendices V](#) and [VI](#) respectively.

⁴ In fulfilling a request, made in good faith, the HPO will supply HPO data, provided the request does not conflict with our obligations of confidentiality or with those under the Data Protection Acts 1988 to 2018 and the General Data Protection Regulation; for this reason certain variables described in this document may not be available for information requests. Availability of information for requests can also be dependent on data quality and coverage too.

⁵ From the 01/01/2011 all cases categorised as in-patients or day cases are to be downloaded from the hospital PAS to HIPE, including those cases not normally coded on HIPE. It is expected that the additional cases in the download will be for non-acute (not normally coded) activity on the hospital campus such as rehabilitation or psychiatry. The HPO identifies for individual hospitals, a list of wards which should be downloaded as part of this change. These additional downloaded records are not included on the national file.

For patients discharged on or after 01/01/2011, the HIPE record will also collect information on internal ward transfers of the patient during the episode of stay. This information is typically stored in a “ward transfer file” or “ward transfer database” as part of the PAS/HIS system. This information will be downloaded to the HIPE portal and can be viewed by the coder but cannot be amended. The information will be exported by the hospital monthly to the HPO as part of the normal export process.

Updates

This document will be updated as variables are added or amended.

Summary of Changes between version 1.0 and 2.0 of Data Dictionary

Addition of variable: Oncology Day Ward Flag to store the value of oncology day ward repeat status.

Addition of code set: RepeatStatus; values for Oncology Day Ward Flag.

Addition of Blackrock Hospice to hospital codes code set.

Summary of Changes between version 2.0 and 3.0 of Data Dictionary

The migration from Windows HIPE (a windows based data entry and reporting system) to the HIPE Portal (a web based portal based on SQL server) has resulted in changes to variable names.

Changes to Variable Name

Diagnoses: Rename variables from diag-CxDIA → **DIAG1–DIAG30**

Diagnosis Consultants: Rename variables from DCON - CxCON → DIAGCONS1 – DIAGCONS30

Procedures: Rename procedure variables from PROC –PkPRO → PROC1-PROC20

Procedure Consultants: Rename procedure consultant variables from PCON – PkCON → PROCON1-PROCON20

Procedure dates: Rename procedure date variables from P1Date or Theatre → PROCDATE1- PROCDATE20

Procedure Anaesthetist: Rename procedure date variables from P1ANA-PkANA → ANACONS1-ANACONS20

Additional Variables in 2011

Hospital Acquired Diagnosis

Health Insurer

Parity Live births

Parity Still births

Procedure dates

Days in Semi Private Bed

Changes to Data Entry Guideline Number of Days in Intensive Care Environment

Additional Codes to Code sets

Additional **Specialty** Code 2605 Breast Surgery

Hospital code for removal of temporary transfer code for CUMH

Summary of Changes between version 3.0 and 4.0 of Data Dictionary

Additional Variables

Time of Admission

Time of Discharge

Code Set Changes

Marital Status – changed to **Marital/Civil Status**, addition of *Civil Partner*, *Former Civil Partner* and *Surviving Civil Partner*

Health Insurer of the Patient - removal of *Hospital Saturday Fund*

Hospital Code – removal of 412, HIPE activity data from University College Hospital Galway and Merlin Park Regional Hospital are now reported as 404, Galway University Hospitals.

Hospital Transfer Codes – addition of 0948, 0949

Errata to Version 3.0

Addition of **DIAGCONS1** variable

Correction of details of **PRIMARYCONS** variable

Correction of data entry guideline at **MEDICAL** variable

Abbreviations

Department of Health & Children (DoHC) changed to Department of Health (DoH)

Summary of Changes between version 4.0 and 5.0 of Data Dictionary

Additional Variables

Type of Elective Admission

Discharge Specialty

Changes to Variable Categories

Health Insurer of the Patient Renamed *Quinn Healthcare* to *Laya*

Mode of Emergency Admission

2 changed to AMAU admitted as inpatient

5 changed to AMAU only and updated explanation to state: "This code is assigned if the patient is admitted as an emergency to the AMAU and discharged from there."

Code Set Changes

Health Insurer of the Patient - New Category *Glohealth*

Changes in terminology

Mode of Emergency Admission was updated to include the term Acute Medical Assessment Unit (AMAU).

Summary of Changes between version 5.0 and 6.0 of Data Dictionary

Some changes to this data dictionary reflect the transfer of HIPE from the ESRI to the HPO.

Additional Variables

- Batch Coded
- Date First Coded
- Last Changed Date/Time

Update variable information to reflect establishment of HPO

- Admitting Consultant
- Discharge Consultant
- Hospital Number

Changes to Variable label

- Marital/Civil Status updated to Civil Status

Code Set Changes

- Area of Residence - added Croatia and Switzerland, updated The Netherlands (Holland)

Changes to Data Entry Guideline

- Mode of Emergency Admission data entry guideline was updated

Additional Appendix

- ASCII File Names

Removal of variables from data dictionary as these are not available on national file

- Additional consultant involvement - encounter consultant
- Additional consultant involvement - encounter position
- Additional consultant involvement - encounter type

Summary of Changes between version 6.0 and 7.0 of Data Dictionary

Additional Variables

- Hospital Acquired Diagnosis 1
- Number of Days in Critical Care Bed
- Number of Days in Intensive Care Environment Single Occupancy
- Number of Days in Intensive Care Environment Multiple Occupancy
- Private Bed Single Occupancy
- Private Bed Multiple Occupancy
- Public Bed Single Occupancy
- Public Bed Multiple Occupancy
- Semi Private Bed Single Occupancy
- Semi Private Bed Multiple Occupancy

Update variable information to reflect update of clinical coding classification to 8th ed ICD-10-AM/ACHI/ACS

- Principal Diagnosis
- Principal Procedure

1st Additional Diagnosis - 29th Additional Diagnosis
1st Additional Procedure - 19th Additional Procedure

Summary of Changes between version 7.0 and 8.0 of Data Dictionary

Update

Contact details

Updated Field Size and Reported for

Episode Number

Update Definition Source and Collected since

Australian Refined - Diagnosis Related Group

Update Definition, Definition Source and Collected since

Major Diagnostic Category (MDC)

Update Order in Instruction Manual

Hospital Number

Summary of Changes between version 8.0 and 8.1 of Data Dictionary

Updated fields:

Definition of Principal Procedure, Additional Procedure 1 – 19

Definition changed from

Clinical intervention that is surgical in nature , carries a procedural risk and/or carries an anaesthetic risk and/or requires specialised training and/or requires special facilities or equipment only available in an acute care setting.

To

Clinical intervention that is surgical in nature **and/or** carries a procedural risk and/or carries an anaesthetic risk and/or requires specialised training and/or requires special facilities or equipment only available in an acute care setting.

Reason for change:

Definition of procedure updated to reflect definition used in ACHI 8th edition.

Summary of Changes between version 8.1 and 9.0 of Data Dictionary

Additional Variable

Medical Discharge Date/Medically Fit for Discharge Date

Removal of Variable

Oncology Day Ward Flag

Code set changes:

Mode of Emergency Admission – New Mode of Emergency Admission added
6 Local Injury Unit Admission Directly from a HSE listed Local Injury Unit.

Changes to Variable Categories

Health Insurer of the Patient Renamed Aviva to Irish Life Health
Mode of Emergency Admission 1 updated to ED of the admitting Hospital
Source of Admission
3 updated to Transfer of admitted patient from Acute Hospital
4 updated to Transfer from Non-Acute Hospital
5 updated to Transfer from hospice

Changes to Data Entry Guideline

Mode of Emergency Admission data entry guideline was updated

Summary of Changes between version 9.0 and 9.1 of Data Dictionary

Code Set Changes

Area of Residence – 1700 Tipperary (Nth Riding) and 0800 Tipperary (Sth Riding) updated to 1708 Tipperary (includes Tipperary North and South Riding)

Summary of Changes between version 9.1 and 10.0 of Data Dictionary

Additional Variables

Transfer Admission Status
Eircode

Removal of Variable

Medical Card Number

Code set changes:

Mode of Emergency Admission – New Mode of Emergency Admission added
7 ASAU admitted as in-patient: This code is assigned if the patient is admitted as an emergency to the hospital through the ASAU
8 ASAU only: This code is assigned if the patient is admitted as an emergency to the ASAU and is discharged from there

Changes to Data Entry Guideline

Mode of Emergency Admission data entry guideline was updated

Summary of Changes between version 10.0 and 11.0 of Data Dictionary

Additional variables:

Hours of Continuous Ventilatory Support (CVS)
Number of Nights in an ED Virtual Ward

Code set changes:

Specialty – Removal of Specialty code '9000 Other'

Changes to Data Entry Guideline:

Admitting Ward – data entry guideline added to include advice on patients admitted to virtual wards.

Updated fields:

Patient's name – Definition of Patient's name changed from
The patient's name
To
The patient's name. This is collected at hospital level only. It is not collected at the national level.

Addition of existing variable to data dictionary:

Length of Stay

Summary of Changes between version 11.0 and 11.1 of Data Dictionary

Changes to Data Entry Guideline:

Admitting Ward – data entry guideline on patients admitted to virtual wards removed as the pilot for the 'number of nights in an ED Virtual Ward' variable ended after Q1 2019.

Number of Nights in an ED Virtual Ward – data entry guideline updated to advise that this variable was introduced on a pilot basis and the pilot ended after Q1 2019.

Summary of Changes between version 11.1 and 12.0 of Data Dictionary

Additional Variables:

Single Bed Days
Multi Bed Days

Removal of Variables:

Private Bed Single Occupancy
Private Bed Multiple Occupancy
Public Bed Single Occupancy
Public Bed Multiple Occupancy
Semi Private Bed Single Occupancy
Semi Private Bed Multiple Occupancy

Update collected since:

Hospital Number, Transfer Hospital: From and Transfer Hospital: To – collected since updated for 2020; footnote added outlining when the private hospitals and COVID 19 step down facilities were added to HIPE

Code Set Changes:

Area of Residence – 1708 Tipperary updated to 1700 Tipperary North Riding and 0800 Tipperary South Riding.

Health Insurer of the Patient – removal of *Glohealth*

Hospital Name updated for 001 and 014

Hospital Transfer Codes – addition of 0938 for CHI Connolly hospital; addition of transfer codes for private hospitals and COVID 19 facilities

HIPE Codes – addition of HIPE codes for private hospitals (HIPE codes 050 to 082)

Update variable information to reflect update of clinical coding classification to 10th ed ICD-10-AM/ACHI/ACS:

Principal Diagnosis

Principal Procedure

1st Additional Diagnosis - 29th Additional Diagnosis

1st Additional Procedure - 19th Additional Procedure

Summary of Changes between version 12.0 and 12.1 of Data Dictionary

Additional Variables:

COVID19 flag

COVID19 Coder Assigned Flag

COVID19 Base Case Date

Changes to variable categories:

Discharge Code

3 updated to “Emergency Transfer to Hospital in Hospital Code Listing or transfer to any Acute Hospital not specified in Hospital Code Listing”

4 updated to “Non Emergency Transfer to Hospital in Hospital Code Listing , or Covid-19 facility, or transfer to any Acute Hospital not specified in Hospital Code Listing”

8 updated to Emergency Transfer to Non-Acute hospital

9 updated to Non Emergency Transfer to Non-Acute hospital

Source of Admission

3 updated to “Transfer of admitted or non-admitted patient from Hospital or Covid -19 facility in Hospital code list or transfer from any Acute Hospital not specified in Hospital Code Listing”

Summary of Changes between version 12.1 and 13.0 of Data Dictionary

No changes except for update of year to 2021

Summary of Changes between version 13.0 and 14.0 of Data Dictionary

Additional Variables:

Discharge Mode
Palliative Care Flag

Updated fields:

The below variables were merged whereas they were previously presented separately, for example, the 1st-29th Additional Diagnosis are presented together.

Date of procedure sequenced 2nd-20th
Hospital Acquired Diagnosis 2-30
Intensive Care Consultant 1-10
1st-29th Additional Diagnosis
1st-29th Additional Diagnosis Consultant
1st-19th Additional Procedure
1st-19th Additional Procedure Anaesthetist
1st-19th Additional Procedure Consultant

Summary of Changes between version 14.0 and 15.0 of Data Dictionary

Additional Variables:

Ukrainian Temp Protection Flag (introduced May 2022)
Attended ITU
Attended HDU

Update variable information to reflect change of Grouper Version:

Australian Refined – Diagnosis Related Group
Major Diagnostic Category (MDC)

Update Collected since, Data Entry Guideline and Field Size:

Medical Record Number

Page Layout

While each page does not necessarily include all fields, each page in the data dictionary has a consistent format as follows:

Variable	Name of variable
Definition	Provides a description of the variable.
Definition Source⁶	What is the source of the definition of this information - e.g. HPO
Source	Information may come from Chart, Hospital PAS, assigned by HPO or it may be derived from other variables.
Collected since⁷	Month and year when collection of variable commenced.
Collected/Derived	Is this variable collected from Chart or is it derived from the HIPE Portal data entry software?
Code Set	Details the information options available for each variable.
Data Entry Guideline	Provides further guidance on how a variable is assigned to case.
Variable Name	Variable name in Portal
Data Type	Integer or Alphanumeric
Field Size	Number of characters in the variable
Populated in National File	If no, this variable is only populated in the hospital version of HIPE and is not available on the national file.
Reported by	Who reports this variable? This will generally be the Hospital
Reported for	For what cases/discharges is this information reported?
Order in Instruction Manual	The HIPE Instruction Manual forms part of the training material provided by the HPO. It provides details of administrative and demographic variables collected and is updated to reflect any changes or updates in data collection, this order is numerically based.
Irish Coding Standard	The Irish Coding Standards (ICS) are used in conjunction with the International Statistical Classification of Diseases and Related Health Problems, Tenth Revision, Australian Modification (ICD-10-AM), Australian Classification of Health Interventions (ACHI) and Australian Coding Standards (ACS) and apply to all activity coded in HIPE in Ireland.

⁶ As the ESRI oversaw the administration and management of the HIPE scheme on behalf of the HSE and the DoH for the period between 1990 and 2013, *ESRI HIPE Unit*, may be recorded as the definition source for a number of variables.

⁷ Between 1990 and 2013 the ESRI managed the HIPE scheme; variables in operation prior to this data will be marked as pre-1990.

Irish Coding Standard	

Admission Weight

Variable	Admission Weight
Definition	Admission weight of patient in grams (Infant).
Definition source	ESRI HIPE Unit
Source	Hospital PAS
Collected since	2004
Collected/Derived	Collected
Code Set	
Data Entry Guideline	Limits: 400 to 9999. Can only enter less than 400 with an explanation. 9999 is entered where admission weight is unknown.
Variable Name	ADMWEIGHT
Data Type	Integer
Field Size	4
Populated in National File	Y
<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>	
Reported by	Hospital
Reported for	All cases where age was less than 28 days (0-27 days), or age was less than 1 year and weight less than 2,500 grams.
Order in Instruction Manual	10
Irish Coding Standard	HIPE Guidelines for Administrative Data VIII

Admitting Consultant

Variable	Admitting Consultant
Definition	The consultant who admits the patient. If there is no clear information on the chart on the identity of the admitting consultant, the code for the primary consultant is used. Each consultant has a unique number/code assigned by the HPO, which may not be used for any other consultant. The unique number assigned by the HPO is encrypted to a unique alphanumeric code when HIPE data are exported from the hospitals. The encrypted values are stored on the HIPE National File and it is not possible to ascertain the identity of individual consultants from any of the consultant fields in the National File.
Definition source	ESRI HIPE unit
Source	Hospital PAS
Collected since	1994
Collected/Derived	Collected
Code Set	
Data Entry Guideline	Where the entire case is handled by one consultant his/her code number need be entered only opposite the principal diagnosis. If more than one consultant is involved in a case the relevant consultant number will be placed opposite the relevant diagnosis/procedures.
Variable Name	ADMCONS
Data Type	Integer
Field Size	4
Populated in National File	Y - encrypted <i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>
Reported by	Hospital
Reported for	All cases reported to HIPE.
Order in Instruction Manual	23b
Irish Coding Standard	

Admitting Ward

Variable	Admitting Ward
Definition	The ward to which the patient is formally admitted, based on the midnight census on the day of admission.
Definition source	Hospital
Source	Hospital PAS
Collected since	1996-2006 optional; 2007 mandatory.
Collected/Derived	Collected
Code Set	
Data Entry Guideline	
Variable Name	ADMWARD
Data Type	Alphanumeric
Field Size	6
Populated in National File	Y
<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>	
Reported by	Hospital
Reported for	All cases reported to HIPE.
Order in Instruction Manual	25
Irish Coding Standard	HIPE Guidelines for Administrative Data II

Age

Variable	Age
Definition	The patient's age in years at admission. Calculated at hospital level.
Definition source	
Source	ADMDATE - DOB
Collected since	pre-1990
Collected/Derived	Derived
Code Set	
Data Entry Guideline	
Variable Name	AGE
Data Type	Integer
Field Size	3
Populated in National File	Y
<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>	
Reported by	n/a
Reported for	All cases reported to HIPE.
Order in Instruction Manual	
Irish Coding Standard	

Age in Weeks

Variable	Age in Weeks
Definition	Age in weeks where patient's age is less than 1 year. Calculated at hospital level.
Definition source	ESRI HIPE Unit
Source	ADMDATE - DOB where AGE < 1.
Collected since	2010
Collected/Derived	Derived
Code Set	
Data Entry Guideline	
Variable Name	AgeInWeeks
Data Type	Integer
Field Size	2
Populated in National File	Y
<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>	
Reported by	n/a
Reported for	All cases where age was less than 1 year.
Order in Instruction Manual	
Irish Coding Standard	

Area of Residence

Variable	Area of Residence
Definition	The place the patient would normally reside. Foreign nationals resident in Ireland should have a code assigned for their Irish place of residence. Foreign visitors on short stay should be coded to their country of residence.
Definition source	ESRI HIPE Unit
Source	Chart
Collected since	pre-1990
Collected/Derived	Collected
Code Set	RESID
Data Entry Guideline	
Variable Name	RESID
Data Type	Integer
Field Size	4

Reported by	Hospital
Reported for	All cases reported to HIPE.
Order in Instruction Manual	
Irish Coding Standard	

Australian Refined - Diagnosis Related Group

Variable	Australian Refined - Diagnosis Related Group
Definition	The DRG scheme enables the disaggregation of patients into homogeneous groups, which are expected to undergo similar treatment processes and incur similar levels of resource use. The data required for DRG assignment include principal and additional diagnoses, procedures performed, age, sex, and discharge status.
Definition source	Grouper Version 8.0 and 10.0 ⁸
Source	Grouping Programme
Collected since	2005 using Grouper Version 5.1; 2009-2014 Grouper Version 6.0; 2015-2022 using Grouper Versions 6.0 and 8.0; 2023 onwards using Grouper Versions 8.0 and 10.0.
Collected/Derived	Derived
Code Set	
Data Entry Guideline	
Variable Name	DRG
Data Type	Alphanumeric
Field Size	4
Populated in National File	Y
<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>	
Reported by	
Reported for	All cases reported to HIPE.
Order in Instruction Manual	
Irish Coding Standard	

⁸ For the purposes of Activity Based Funding HIPE data will be grouped using Versions 8.0 and 10.0 of the AR-DRG Classification.

Batch Coded

Variable	Batch Coded
Definition	Indicates that a case is batch coded by the hospital. A batch coded case is flagged on the national file with the value 1.
Definition source	
Source	HIPE Portal Batch Coder
Collected since	2013
Collected/Derived	Derived (system generated)
Code Set	
Data Entry Guideline	
Variable Name	BATCH_CODE_BATCH
Data Type	Integer
Field Size	1
Populated in National File	Y
<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>	
Reported by	
Reported for	All cases reported to HIPE.
Order in Instruction Manual	
Irish Coding Standard	

Civil Status

Variable	Civil Status
Definition	Current civil status of the patient.
Definition source	ESRI HIPE Unit
Source	Hospital PAS
Collected since	Pre-1990; updated in 2001 and updated 2012 following Civil Partnership and Certain Rights and Obligations of Cohabitants Act 2010. Variable label updated in 2014 from Marital/Civil Status to Civil Status.
Collected/Derived	Collected
Code Set	MARR
Data Entry Guideline	
Variable Name	MARRSTATUS
Data Type	Integer
Field Size	1
Populated in National File	Y
<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>	
Reported by	Hospital

Consultant Specialty

Variable	Consultant Specialty
Definition	A specialty code is assigned to the record on the basis of the specialty assignment of the consultant associated with the principal diagnosis. The specialty of the consultant is the specialty in which s/he is formally recognised and contracted to work. A consultant may be formally recognised and contracted to work in more than one specialty; in these cases one specialty is recognised as the main one.
Definition source	DoH
Source	Hospital PAS
Collected since	1994
Collected/Derived	Collected
Code Set	SPECIALTY
Data Entry Guideline	Specialty is assigned locally at the hospital from the DoH list.
Variable Name	SPECIALTY
Data Type	Integer
Field Size	4
Populated in National File	Y
<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>	
Reported by	Hospital

COVID19 Flag

Variable	COVID19 Flag
Definition	The COVID19 flag is set “1 Yes” where the patient has a lab confirmed COVID-19 Diagnosis and is blank otherwise. This diagnosis may not be have occurred during the hospital visit so the flag is set if the patient has either U07.1 coded or the patient indicates they have previously been diagnosed with lab confirmed COVID-19. In the latter case, the flag is considered to be “coder assigned”.

COVID19 Coder Assigned Flag

Variable	COVID19 Coder Assigned Flag
Definition	<p>The COVID19 Coder Assigned Flag is set when the coder assigned the COVID19 flag. A coder assigns the COVID19 Flag when the patient has a previously diagnosed lab confirmed diagnosis of Covid 19 prior to admission as opposed to a diagnosis during this episode (and coded as U07.1).</p> <p>A value of 1 means the coder set the COVID19 flag. Note where the lab confirmed diagnoses occurred during the episode of care and U07.1 is coded for the case, the value will be 0 even if the coder changes the COVID19 flag.</p> <p>This field is collected automatically when the COVID19Flag field is recorded.</p>

COVID19 Base Case Date

Variable	COVID19 Base Case Date
Definition	The COVID19 base case date is the discharge date of the first case where the patient was flagged as having a lab confirmed COVID-19 Diagnosis (i.e. COVID19 flag is set). A case may be marked either where the patient had a lab confirmed COVID-19 diagnosis during an episode (indicated by the presence of U07.1) or where a patient indicates during a case that they previously had a lab confirmed COVID-19 diagnosis.

Date of Birth

Variable	Date of Birth
Definition	Patient's Date of Birth. At national level only month and year of birth are available with day of birth set to 15.
Definition source	ESRI HIPE Unit
Source	Hospital PAS
Collected since	pre-1990
Collected/Derived	Collected
Code Set	
Data Entry Guideline	At least year of birth is required. If Day/Month are unknown, enter as 00/00/YY. Day, month will be derived to 01, and the variable UNSURE is populated.
Variable Name	DOB
Data Type	Date
Field Size	8
Populated in National File	Y (month and year only)
<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>	
Reported by	Hospital
Reported for	All cases reported to HIPE.
Order in Instruction Manual	9
Irish Coding Standard	

Date of Discharge

Variable	Date of Discharge
Definition	The date on which the patient is discharged from hospital following an episode of care. If the patient dies during the episode of care, the date of death is the date of discharge.
Definition source	ESRI HIPE Unit
Source	Hospital PAS
Collected since	pre-1990
Collected/Derived	Collected
Code Set	
Data Entry Guideline	DD/MM/YYYY must be greater than or equal to ADMDATE.
Variable Name	DISDATE
Data Type	Date
Field Size	8
Populated in National File	Y
<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>	
Reported by	Hospital

Date of Principal Procedure

Variable	Date of Principal Procedure
Definition	Date the Principal Procedure was performed.
Definition source	ESRI HIPE Unit
Source	Chart
Collected since	Name change 2011 - migration to Portal. Previously called THEATRE.
Collected/Derived	Collected
Code Set	
Data Entry Guideline	DD/MM/YYYY must be greater than or equal to ADMDATE and less than or equal to DISDATE. Mandatory where PROC1 is completed.
Variable Name	PROCDATE1
Data Type	Date
Field Size	8
Populated in National File	Y
<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>	
Reported by	Hospital
Reported for	All cases where a principal procedure (PROC1) was performed.
Order in Instruction Manual	24
Irish Coding Standard	ICS 002x

Date of procedure sequenced 2nd-20th

Variable	Date of procedure sequenced 2nd-20th
Definition	Date of procedure sequenced 2 nd -20 th .
Definition source	ESRI HIPE Unit
Source	Chart
Collected since	2011 - migration to Portal.
Collected/Derived	Collected
Code Set	
Data Entry Guideline	DD/MM/YYYY must be greater than or equal to ADMDATE and less than or equal to DISDATE.
Variable Name	PROCDATE2-PROCDATE20
Data Type	Date
Field Size	8
Populated in National File	Y
<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>	
Reported by	Hospital
Reported for	All cases where an additional procedure (PROC2-PROC20) was performed.
Order in Instruction Manual	24
Irish Coding Standard	ICS002x

Date of Transfer to Pre-Discharge Unit/Rehab

Variable	Date of Transfer to Pre-Discharge Unit/Rehab
Definition	Date when a patient is transferred to a registered Pre-Discharge Unit/Rehab within the hospital prior to discharge.
Definition source	ESRI HIPE Unit
Source	Chart
Collected since	2004
Collected/Derived	Collected
Code Set	
Data Entry Guideline	DD/MM/YYYY - must be greater than or equal to ADMDATE & less than DISDATE. Hospitals must register the pre-Discharge Unit/Rehab with the Healthcare Pricing Office.
Variable Name	PDUTRANSDATE
Data Type	Date
Field Size	8
Populated in National File	Y

Day Case Indicator

Variable	Day Case Indicator
Definition	Day Case.
Definition source	DoH
Source	Hospital PAS
Collected since	2000
Collected/Derived	Collected
Code Set	DAYCASE
Data Entry Guideline	A day case is a patient who is admitted to hospital on an elective basis for care and/or treatment which does not require use of a hospital bed overnight and who is discharged as scheduled. If Daycase is indicated, Day Ward Indicator/Identifier must be completed.
Variable Name	ISDAYCASE
Data Type	Integer
Field Size	1
Populated in National File	Y
	<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>
Reported by	Hospital
Reported for	All cases reported to HIPE.
Order in Instruction Manual	17
Irish Coding Standard	

Day Ward Identifier

Variable	Day Ward Identifier
Definition	Name of pre-registered Day Ward - to identify the day place where the patient was treated.
Definition source	ESRI HIPE Unit
Source	Hospital PAS
Collected since	2005
Collected/Derived	Collected
Code Set	
Data Entry Guideline	Dedicated Day Wards must be registered with the Healthcare Pricing Office.
Variable Name	DAYWARD
Data Type	Alphanumeric
Field Size	6
Populated in National File	Y
<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>	
Reported by	Hospital
Reported for	All cases where WARDIND = 1.
Order in Instruction Manual	19
Irish Coding Standard	

Day Ward Indicator

Variable	Day Ward Indicator
Definition	Indicates if a day case patient was admitted to a dedicated Day Ward.
Definition source	ESRI HIPE Unit
Source	Hospital PAS
Collected since	2004
Collected/Derived	Collected
Code Set	WARDIND
Data Entry Guideline	Dedicated Day Wards must be registered with the Healthcare Pricing Office. WARDIND = 0 if patient is marked as a day case but the episode was not admitted to a dedicated Day Ward, WARDIND = 1 if patient is marked as a day case and the episode was admitted to a dedicated Day Ward, WARDIND = 2 If the patient is marked as a day case and the setting of the episode is unknown.
Variable Name	WASINDAYWARD
Data Type	Integer
Field Size	1
Populated in National File	Y
<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>	
Reported by	Hospital
Reported for	All cases where DAYCASE = 1.
Order in Instruction Manual	18
Irish Coding Standard	HIPE Guideline V

Discharge Code

Variable	Discharge Code
Definition	Identifies the discharge destination.
Definition source	ESRI HIPE Unit
Source	Hospital PAS
Collected since	2002
Collected/Derived	Collected
Code Set	<u>DISC_CODE</u>
Data Entry Guideline	
Variable Name	DISCHARGECODE
Data Type	Integer
Field Size	2
Populated in National File	Y
<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>	
Reported by	Hospital
Reported for	All cases reported to HIPE.
Order in Instruction Manual	7
Irish Coding Standard	

Discharge Consultant

Variable	Discharge Consultant
Definition	The consultant who discharges the patient at the end of the episode. Each consultant has a unique number/code assigned by the HPO, which may not be used for any other consultant. The unique number assigned by the HPO is encrypted to a unique Alphanumeric code when HIPE data are exported from the hospitals. The encrypted values are stored on the HIPE National File and it is not possible to ascertain the identity of individual consultants from any of the consultant fields in the National File.
Definition source	ESRI HIPE Unit
Source	Hospital PAS
Collected since	1996 - 2001 optional; 2002 - mandatory.
Collected/Derived	Collected
Code Set	
Data Entry Guideline	Where the entire case is handled by one consultant his/her code number need be entered only opposite the principal diagnosis. If more than one consultant is involved in a case the relevant consultant number will be placed opposite the relevant diagnosis/procedures
Variable Name	DISCONS
Data Type	Integer
Field Size	4
Populated in National File	Y - encrypted <i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>
Reported by	Hospital
Reported for	All cases reported to HIPE.
Order in Instruction Manual	22c
Irish Coding Standard	

Discharge Mode

Variable	Discharge Mode
Definition	Identifies the type of post-acute care to be received by the patient following their discharge from acute care (i.e. the end of their in-patient or day case stay) if applicable to a case.
Definition source	HPO
Source	Hospital PAS
Collected since	2022
Collected/Derived	Collected
Code Set	DISCHARGEMODE
Data Entry Guideline	
Variable Name	DISCHARGEMODE
Data Type	Integer
Field Size	1
Populated in National File	Y
<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>	
Reported by	Hospital
Reported for	Patients being transferred to another healthcare facility for additional care, therefore, it is not collected for every Discharge Code.
Order in Instruction Manual	8
Irish Coding Standard	

Discharge Specialty

Variable	Discharge Specialty
Definition	The specialty of the discharge consultant identified by a four digit code
Definition source	DoH
Source	Hospital PAS
Collected since	2013
Collected/Derived	Collected
Code Set	Specialty
Data Entry Guideline	Specialty is assigned locally at the hospital from the DoH list.
Variable Name	DisConsSpec
Data Type	Integer
Field Size	4
Populated in National File	Y
<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>	
Reported by	Hospital
Reported for	All cases reported to HIPE.
Order in Instruction Manual	23d
Irish Coding Standard	

Discharge Status

Variable	Discharge Status
Definition	Public/Private status of patient on discharge.
Definition source	ESRI HIPE Unit
Source	Hospital PAS
Collected since	1999
Collected/Derived	Collected
Code Set	DIS STATUS
Data Entry Guideline	Refers to the public/private status of patient, it does not relate to the type of bed occupied nor is it an indicator of possession of private health insurance.
Variable Name	DISSTATUS
Data Type	Integer
Field Size	1
Populated in National File	Y
<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>	
Reported by	Hospital
Reported for	All cases reported to HIPE.
Order in Instruction Manual	16
Irish Coding Standard	

Discharge Ward

Variable	Discharge Ward
Definition	The ward occupied prior to discharge.
Definition source	Hospital
Source	Hospital PAS
Collected since	1996-2006 optional; 2007 mandatory.
Collected/Derived	Collected
Code Set	
Data Entry Guideline	
Variable Name	DISWARD
Data Type	Alphanumeric
Field Size	6
Populated in National File	Y

Order in Instruction Manual	25
Irish Coding Standard	HIPE Guideline II

Eircode Routing Key

Variable	Eircode Routing Key
Definition	<p>Eircode is a smart location postcode system for all Irish addresses. An Eircode is a 7 alphanumeric character code consisting of a “Routing key”(consisting of the first 3 characters) and a “Unique Identifier” (consisting of the remaining characters).</p> <p>The complete Eircode is stored at a hospital level while the routing key only is stored at the national level.</p>
Definition source	National
Source	Hospital PAS
Collected since	2018 - optional
Collected/Derived	Collected
Code Set	EIRCODE
Data Entry Guideline	
Variable Name	EIRCODE
Data Type	Alphanumeric
Field Size	3
Populated in National File	Y (only the Routing key is exported to the National File) <i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>
Reported by	Hospital
Reported for	Reported for all cases except where the patient is from a non-Irish address (area of residence code >3300) or has no fixed abode (area of residence code = 0000).
Order in Instruction Manual	14
Irish Coding Standard	

Episode Number

Variable	Episode Number
Definition	IPMS, PAS or HIS episode identifier. Definition varies by hospital and may not be completed by all hospitals. This field is always blank.
Definition source	Hospital
Source	Hospital PAS
Collected since	2000 locally, 2010 national level.
Collected/Derived	Collected
Code Set	
Data Entry Guideline	
Variable Name	EPISODENUMBER and EXTEPISODENUMBER
Data Type	Alphanumeric
Field Size	12
Populated in National File	Y
<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>	
Reported by	Hospital
Reported for	All cases downloaded from a IPMS, PAS or HIS system. For cases discharged from 01/01/2016, the download will be changed to allow the transfer of an Extended Episode Number consisting of 12 characters. Prior to this the maximum length of the episode number was 8 characters.
Order in Instruction Manual	
Irish Coding Standard	

Health Insurer

Variable	Health Insurer
Definition	Name of Health Insurer. At national level categories available are <i>Named Health Insurer/Not Stated/Other/No Insurance</i>
Definition source	Casemix Technical Group
Source	PAS
Collected since	2011 - migration to Portal, updated 2013.
Collected/Derived	Collected
Code Set	Health Insurer
Data Entry Guideline	
Variable Name	HealthInsurer
Data Type	Integer
Field Size	2
Populated in National File	Y (<i>Named health insurer/Not Stated/Other/No Insurance</i>) (If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)
Reported by	Hospital
Reported for	All cases where DIS_STATUS = 2 (private).
Order in Instruction Manual	16
Irish Coding Standard	

Hospital Acquired Diagnosis 1

Variable	Hospital Acquired Diagnosis 1
Definition	Flag: diagnosis acquired during the neonates birth episode, principal diagnosis.
Definition source	HPO
Source	Chart
Collected since	2015
Collected/Derived	Collected
Code Set	1 = Hospital Acquired Diagnosis, otherwise null
Data Entry Guideline	
Variable Name	HADX1
Data Type	Integer
Field Size	1
Populated in National File	Y
<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>	
Reported by	Hospital
Reported for	Optional for neonates aged less than 28 days on their birth episode only.
Order in Instruction Manual	
Irish Coding Standard	ICS 0048

Hospital Acquired Diagnosis 2-30

Variable	Hospital Acquired Diagnosis 2-30
Definition	Flag: diagnosis acquired during the patient's episode of care that was not present on admission, 1 st additional diagnosis to 29 th additional diagnosis (DIAG2-DIAG30).
Definition source	ESRI HIPE Unit
Source	Chart
Collected since	2011 - migration to Portal.
Collected/Derived	Collected
Code Set	1 = Hospital Acquired Diagnosis, otherwise null
Data Entry Guideline	
Variable Name	HADX2-HADX30
Data Type	Integer
Field Size	1
Populated in National File	Y
<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>	
Reported by	Hospital
Reported for	Optional for all additional diagnoses.
Order in Instruction Manual	
Irish Coding Standard	ICS 0048

Hospital Number

Variable	Hospital Number
Definition	Unique numeric identifier assigned to each hospital by HIPE for operational purposes.
Definition source	ESRI HIPE Unit
Source	Assigned by the HPO.
Collected since	pre-1990; updated 2020 ⁹
Collected/Derived	Collected
Code Set	Hospital Code List
Data Entry Guideline	The 3-digit number is allocated to the hospital by the HPO for HIPE purposes and is automatically assigned by the HIPE software. This code number differs from the DoH hospital codes which are used for transfers to and from hospitals.
Variable Name	HOSPITAL
Data Type	Alphanumeric
Field Size	3
Populated in National File	Y
<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>	
Reported by	Hospital
Reported for	All cases reported to HIPE.
Order in Instruction Manual	29
Irish Coding Standard	

⁹ Private hospitals and COVID 19 step down facilities were added in May 2020 and were made available for cases coded in 2020

Hours of Continuous Ventilatory Support (CVS)

Variable	Hours of Continuous Ventilatory Support (CVS)
Definition	Where a patient is admitted to an ICU, the number of hours of continuous ventilatory support (CVS) will be collected for all cases where a code from block [569] <i>Ventilatory support</i> is coded i.e. mechanical ventilation.
Definition source	HPO HIPE Unit
Source	Hospital PAS
Collected since	2019
Collected/Derived	Collected
Code Set	
Data Entry Guideline	Where the patient visits the ICU on more than one occasion, the cumulative number of hours should be recorded. Hours of CVS should be recorded for completed hours only. This variable is not required to be collected for noninvasive ventilation.
Variable Name	CVS
Data Type	Integer
Field Size	4
Populated in National File	Y
<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>	
Reported by	Hospital
Reported for	Cases reported to HIPE where the patient was admitted to an ICU.

¹⁰ For the purposes of Activity Based Funding HIPE data will be grouped using Versions 8.0 and 10.0 of the AR-DRG Classification.

Medical Card

Variable	Medical Card
Definition	Medical Card Indicator.
Definition source	ESRI HIPE Unit
Source	Hospital PAS
Collected since	1994
Collected/Derived	Collected
Code Set	MCARD
Data Entry Guideline	
Variable Name	HASMEDCARD
Data Type	Integer
Field Size	1
Populated in National File	Y
<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>	
Reported by	Hospital
Reported for	All cases reported to HIPE.
Order in Instruction Manual	13
Irish Coding Standard	

Medical Discharge Date/Medically Fit for Discharge Date

Variable	Medical Discharge Date/Medically Fit for Discharge Date
Definition	The medical discharge date is the date where a patient had been identified as being fit for discharge (sometimes referred to as “clinically fit for discharge date”).
Definition source	HPO HIPE Unit
Source	Hospital PAS
Collected since	2017
Collected/Derived	Collected
Code Set	
Data Entry Guideline	Only to be recorded if there is evidence in the chart of a medical discharge date. Otherwise the medical discharge date is the discharge date.
Variable Name	MEDDISDATE
Data Type	Date
Field Size	8
Populated in National File	Y - encrypted
<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>	
Reported by	Hospital
Reported for	All cases reported to HIPE with a discharge date of 01/01/2017 or later except where DISC_CODE is 00 (Self Discharge), 03 (Transfer to Hospital - Emergency), 06 (Died with Post Mortem), 07 (Died with no Post Mortem), 13 (Absconded)
Order in Instruction Manual	30
Irish Coding Standard	

Medical Record Number

Variable	Medical Record Number
Definition	Unique identifier assigned by hospital to this patient within this hospital but not necessarily unique to this patient encounter. All encounters relating to a particular patient in the same hospital should be recorded under the same MRN, but this is not always possible.
Definition source	Hospital
Source	Hospital PAS
Collected since	pre-1990; updated 2023
Collected/Derived	Collected
Code Set	
Data Entry Guideline	Determined by the hospital, if number of digits is less than 8, place leading zeros before the Chart Number. Up to 2 Alphanumeric digits allowed, place these before the chart number and in the first position. Chart numbers that are keyed as 6 or 7 digits are stored with # in the first position or second on the National File.
Variable Name	MRN
Data Type	Alphanumeric
Field Size	8
Populated in National File	Y - encrypted <i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>
Reported by	Hospital
Reported for	All cases reported to HIPE.
Order in Instruction Manual	2
Irish Coding Standard	

Mode of Emergency Admission

Variable	Mode of Emergency Admission
Definition	Indicates where the patient was treated prior to being admitted into the hospital as an emergency in-patient or when the patient was treated only in a registered Acute Medical Assessment Unit (AMAU) or in a registered Acute Surgical Assessment Unit (ASAU). (AMAU/ASAU must be registered with Healthcare Pricing Office).
Definition source	ESRI HIPE Unit
Source	Hospital PAS
Collected since	2004; updated 2017 and 2018
Collected/Derived	Collected
Code Set	EMADM
Data Entry Guideline	<p>Use code = 2 (AMAU admitted as in-patient) where the patient is admitted as an emergency to the hospital through the AMAU.</p> <p>Use code =5 (AMAU only) where the patient is admitted as an emergency to the AMAU and discharged from there.</p> <p>Use code = 6 (Local Injury Unit) if the patient was in a Local Injury Unit immediately prior to their admission as an in-patient.</p> <p>Use code = 7 (ASAU admitted as in-patient) where the patient is admitted as an emergency to the hospital through the ASAU.</p> <p>Use code = 8 (ASAU only) where the patient is admitted as an emergency to the ASAU and is discharged from there.</p>
Variable Name	EMADM

Field Size	1
Populated in National File	Y
<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>	
Reported by	Hospital
Reported for	All cases reported to HIPE where ADMTYPE was 4 (Emergency), 5 (Emergency Readmission), or 7 (New born).
Order in Instruction Manual	4
Irish Coding Standard	

Multi Bed Days

Variable	Multi Bed Days
Definition	The number of days a patient spends in a bed in a multiple occupancy room/ward.
Definition source	HPO HIPE Unit
Source	Hospital PAS
Collected since	2020
Collected/Derived	Collected
Code Set	
Data Entry Guideline	The midnight census can be used to determine the number of days spent in these environments. If the patient spends less than 1 day in these environments and is not present at the time of the midnight census, a stay of less than one day can optionally be recorded as '1' day.
Variable Name	MULTIBEDDAYS
Data Type	Integer
Field Size	3
Populated in National File	Y
<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>	
Reported by	Hospital
Reported for	All cases reported to HIPE.
Order in Instruction Manual	22
Irish Coding Standard	

Non Acute Length of Stay: Temporary Leave Days

Variable	Non Acute Length of Stay: Temporary Leave Days
Definition	Number of days a patient did not spend in hospital during an episode.
Definition source	DoH
Source	Chart
Collected since	2007
Collected/Derived	Collected
Code Set	
Data Entry Guideline	A patient is temporarily discharged when: the patient is allowed to leave the hospital for a short number of days; their bed in hospital remains for their use and is not available for another patient; the patient returns after the specified amount of time to continue their ongoing care. Temporary Leave Days do NOT apply in the following situations: 1) patient is considered clinically discharged but continues to reside in a bed prior to transfer elsewhere 2) patient is temporarily sent to another hospital for a day to undergo a particular procedure 3) patient returns home during a day and returns to hospital before midnight 4) patient returns home for more than 3 days and is then readmitted.
Variable Name	TLDAYS
Data Type	Integer
Field Size	3
Populated in National File	Y
<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>	
Reported by	Hospital
Reported for	All cases reported to HIPE where a patient was temporarily discharged.
Order in Instruction Manual	26
Irish Coding Standard	HIPE Guidelines for Administrative Data I

Number of Days in Critical Care Bed

Variable	Number of Days in Critical Care Bed
Definition	This identifies the number of days a patient spent in a Level 2, Level 3 or Level 3s critical care bed.
Definition source	National Clinical Programme for Critical Care, HSE
Source	Hospital PAS
Collected since	2015
Collected/Derived	Collected
Code Set	
Data Entry Guideline	<p>The number of days is to be based on the midnight census. Intensive care beds are considered to be non-designated and as such are neither public nor private. Level 2 care = Active management by the critical care team to treat and support critically ill patients with primarily single organ failure. Level 3 care = Active management by the critical care team to treat and support critically ill patients with two or more organ failures. Level 3(s) = care Level 3 with regional/national service.</p> <p>http://www.hse.ie/eng/about/Who/clinical/natclinprog/criticalcareprogramme/modelofcare/criticalcare.pdf</p>
Variable Name	CriticalCareBedDays
Data Type	Integer
Field Size	3
Populated in National File	Y
<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>	
Reported by	Hospital
Reported for	All cases reported to HIPE.
Order in Instruction Manual	27
Irish Coding Standard	

Number of Days in Intensive Care Environment

Variable	Number of Days in Intensive Care Environment
Definition	This identifies the number of days, or part thereof, the patient spent in an intensive care environment e.g. ICU/ITU/CCU/HDU/NITU etc.
Definition source	ESRI HIPE Unit
Source	Hospital PAS
Collected since	1996 - optional; 2002 - mandatory. 2011 - definition revised from "based on midnight census" to "can be based on midnight census".
Collected/Derived	Collected
Code Set	
Data Entry Guideline	The midnight census can be used to determine the number of days spent in these environments. If the patient spends less than 1 day in these environments and is not present at the time of the midnight census, a stay of less than one day can optionally be recorded as '1' day. Where part of day is spent in ICU the allocation of public/private/semi- private days can be adjusted accordingly.
Variable Name	ITUDAYS
Data Type	Integer
Field Size	3
Populated in National File	Y <i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>
Reported by	Hospital
Reported for	All cases reported to HIPE.
Order in Instruction Manual	20
Irish Coding Standard	

Number of Days in Intensive Care Environment Single Occupancy

Variable	Number of Days in Intensive Care Environment Single Occupancy
Definition	This identifies the number of days, or part thereof, the patient spent in an intensive care environment e.g. ICU/ITU/CCU/HDU/NITU etc. - single occupancy room/ward.
Definition source	HPO
Source	Hospital PAS
Collected since	2015
Collected/Derived	Collected
Code Set	
Data Entry Guideline	The midnight census can be used to determine the number of days spent in these environments. If the patient spends less than 1 day in these environments and is not present at the time of the midnight census, a stay of less than one day can optionally be recorded as '1' day. Where part of day is spent in ICU the allocation of public/private/semi- private days can be adjusted accordingly.
Variable Name	ITUDAYSSINGLE
Data Type	Integer
Field Size	3
Populated in National File	Y
<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>	
Reported by	Hospital
Reported for	All cases reported where DIS STATUS = 2 (private).
Order in Instruction Manual	20
Irish Coding Standard	

Number of Days in Intensive Care Environment Multiple Occupancy

Variable	Number of Days in Intensive Care Environment Multiple Occupancy
Definition	This identifies the number of days, or part thereof, the patient spent in an intensive care environment e.g. ICU/ITU/CCU/HDU/NITU etc. - multiple occupancy room/ward.
Definition source	HPO
Source	Hospital PAS
Collected since	2015
Collected/Derived	Collected
Code Set	
Data Entry Guideline	The midnight census can be used to determine the number of days spent in these environments. If the patient spends less than 1 day in these environments and is not present at the time of the midnight census, a stay of less than one day can optionally be recorded as '1' day. Where part of day is spent in ICU the allocation of public/private/semi- private days can be adjusted accordingly.
Variable Name	ITUDAYSMULTI
Data Type	Integer
Field Size	3
Populated in National File	Y
<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>	
Reported by	Hospital
Reported for	All cases reported where DIS STATUS = 2 (private).
Order in Instruction Manual	20
Irish Coding Standard	

Number of Nights in an ED Virtual Ward

Variable	Number of Nights in an ED Virtual Ward
Definition	The number of nights a patient spends in a registered ED virtual ward, where the decision to admit has been made. This is based on the midnight census. The field will default to blank meaning the patient did not spend any time in an ED virtual ward.
Definition source	HPO HIPE Unit
Source	Hospital PAS
Collected since	2019 – optional
Collected/Derived	Collected
Code Set	
Data Entry Guideline	All ED virtual wards must be registered with the Healthcare Pricing Office. Note that this variable was introduced on a pilot basis and this pilot ended after Q1 2019.
Variable Name	vWardBedDays
Data Type	Integer
Field Size	3
Populated in National File	Y
<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>	
Reported by	Hospital
Reported for	Cases with an emergency admission type. It is collected for all patients with a virtual ward element of their episode of care.
Order in Instruction Manual	30
Irish Coding Standard	

Palliative Care

Variable	Palliative Care
Definition	Indicates when the specialist palliative care team attended a patient during their episode of care.
Definition source	HPO
Source	Chart
Collected since	2022
Collected/Derived	Collected
Code Set	PalliativeCare
Data Entry Guideline	The default value for this field is “0 No” (i.e. that the specialist palliative care team did not attend the patient).
Variable Name	PalliativeCare
Data Type	Char
Field Size	1
Populated in National File	Y
<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>	
Reported by	Hospital
Reported for	All cases reported to HIPE.
Order in Instruction Manual	33
Irish Coding Standard	ICS 2116

Parity: Live births

Variable	Parity: Live births
Definition	Number of previous live births.
Definition source	ESRI HIPE Unit
Source	Chart
Collected since	2011 - migration to Portal.
Collected/Derived	Collected
Code Set	
Data Entry Guideline	Current pregnancy is not included. If information is not available please enter NA.
Variable Name	LiveBirths
Data Type	Char
Field Size	2
Populated in National File	Y
<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>	
Reported by	Hospital
Reported for	Mandatory where ADMTYPE = 6 (maternity), optional for other female patients.
Order in Instruction Manual	28
Irish Coding Standard	HIPE Guidelines for Administrative Data IX

Parity: Still births

Variable	Parity: Still births
Definition	Number of previous still births.
Definition source	ESRI HIPE Unit
Source	Chart
Collected since	2011 - migration to Portal.
Collected/Derived	Collected
Code Set	
Data Entry Guideline	Current pregnancy is not included. If information is not available please enter NA.
Variable Name	Stillbirths
Data Type	Char
Field Size	2
Populated in National File	Y
<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>	
Reported by	Hospital
Reported for	Mandatory where ADMTYPE = 6 (maternity), optional for other female patients.
Order in Instruction Manual	28
Irish Coding Standard	HIPE Guidelines for Administrative Data IX

Patient's name

Variable	Patient's name
Definition	The patient's name. This is collected at hospital level only. It is not collected at the national level.
Definition source	Hospital
Source	Hospital PAS
Collected since	pre-1990
Collected/Derived	Collected
Code Set	
Data Entry Guideline	
Variable Name	FULLNAME
Data Type	Alphanumeric
Field Size	15
Populated in National File	N
<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>	
Reported by	Hospital
Reported for	All cases reported to HIPE.
Order in Instruction Manual	
Irish Coding Standard	

Primary Consultant

Variable	Primary Consultant
Definition	The primary consultant of a case is the consultant who has overall responsibility for the case.
Definition source	ESRI HIPE Unit
Source	Hospital PAS
Collected since	01/09/2008
Collected/Derived	Collected
Code Set	
Data Entry Guideline	Where the entire case is handled by one consultant his/her code number need be entered only opposite the principal diagnosis. If more than one consultant is involved in a case the relevant consultant number will be placed opposite the relevant diagnosis/procedures.
Variable Name	PrimaryCons
Data Type	Alphanumeric
Field Size	4
Populated in National File	Y - encrypted <i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>
Reported by	Hospital
Reported for	All cases reported to HIPE.
Order in Instruction Manual	23a
Irish Coding Standard	

Principal Diagnosis

Variable	Principal Diagnosis
Definition	The diagnosis established after study to be chiefly responsible for occasioning the episode of admitted patient care.
Definition source	10th ed ICD-10-AM/ACHI/ACS and ICS
Source	Chart
Collected since	Pre-1990. Name Change 2011 from DIAG to DIAG1.
Collected/Derived	Collected
Code Set	10th ed ICD-10-AM/ACHI/ACS and ICS
Data Entry Guideline	
Variable Name	DIAG1
Data Type	Alphanumeric
Field Size	5
Populated in National File	Y
<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>	
Reported by	Hospital
Reported for	All cases reported to HIPE.
Order in Instruction Manual	
Irish Coding Standard	

Principal Diagnosis Consultant

Variable	Principal Diagnosis Consultant
Definition	Consultant responsible for the principal diagnosis.
Definition source	ESRI HIPE Unit
Source	Chart
Collected since	Pre-1990. Name change 2011, formerly DCON.
Collected/Derived	Collected
Code Set	
Data Entry Guideline	
Variable Name	DIAGCONS1
Data Type	Alphanumeric
Field Size	4
Populated in National File	Y - encrypted
<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>	
Reported by	Hospital
Reported for	All cases reported to HIPE.
Order in Instruction Manual	23
Irish Coding Standard	

Principal Procedure

Variable	Principal Procedure
Definition	The principal procedure is the procedure performed for treatment of the principal diagnosis or a diagnostic/exploratory procedure related to the principal diagnosis. A procedure is defined as a clinical intervention that is surgical in nature and/or carries a procedural risk and/or carries an anaesthetic risk and/or requires specialised training and/or requires special facilities or equipment only available in an acute care setting.
Definition source	10th ed ICD-10-AM/ACHI/ACS and ICS
Source	Chart
Collected since	Pre-1990. Name change 2011 formerly PROC.
Collected/Derived	Collected
Code Set	10th ed ICD-10-AM/ACHI/ACS and ICS
Data Entry Guideline	The order of procedures is determined by the following hierarchy: procedure performed for treatment of principal diagnosis, procedure performed for treatment of an additional diagnosis, diagnostic/exploratory procedure related to principal diagnosis, diagnostic procedure related to additional diagnosis.
Variable Name	PROC1
Data Type	Integer
Field Size	7
Populated in National File	Y
<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>	
Reported by	Hospital
Reported for	All cases where a procedure was performed.
Order in Instruction Manual	
Irish Coding Standard	

Principal Procedure Anaesthetist

Variable	Principal Procedure Anaesthetist
Definition	Consultant anaesthetist responsible for anaesthetics in principal procedure.
Definition source	ESRI HIPE Unit
Source	Chart
Collected since	01 Sep 2008. Name change 2011, formerly P1ANA.
Collected/Derived	Collected
Code Set	
Data Entry Guideline	
Variable Name	ANACONS1
Data Type	Alphanumeric
Field Size	4
Populated in National File	Y - encrypted
<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>	
Reported by	Hospital
Reported for	All cases where the procedure was performed with anaesthetic.
Order in Instruction Manual	23e
Irish Coding Standard	

Principal Procedure Consultant

Variable	Principal Procedure Consultant
Definition	Consultant responsible for principal procedure.
Definition source	ESRI HIPE Unit
Source	Chart
Collected since	Pre-1990. Name change 2011, formerly PCON.
Collected/Derived	Collected
Code Set	
Data Entry Guideline	
Variable Name	PROCCONS1
Data Type	Alphanumeric
Field Size	4
Populated in National File	Y - encrypted
<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>	
Reported by	Hospital
Reported for	All cases where a procedure was performed.
Order in Instruction Manual	
Irish Coding Standard	

Private Bed

Variable	Private Bed
Definition	Number of days patient spent in a private bed.
Definition source	ESRI HIPE Unit
Source	Hospital PAS
Collected since	2002
Collected/Derived	Collected
Code Set	
Data Entry Guideline	
Variable Name	PRIVDAYS
Data Type	Integer
Field Size	3
Populated in National File	Y
<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>	
Reported by	Hospital
Reported for	All cases reported to HIPE.
Order in Instruction Manual	21
Irish Coding Standard	

Public Bed

Variable	Public Bed
Definition	Number of days patient spent in a public bed.
Definition source	ESRI HIPE Unit
Source	Hospital PAS
Collected since	2002 - optional; 2008 mandatory.
Collected/Derived	Collected
Code Set	
Data Entry Guideline	
Variable Name	PUBDAYS
Data Type	Integer
Field Size	3
Populated in National File	Y
<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>	
Reported by	Hospital
Reported for	All cases reported to HIPE.
Order in Instruction Manual	21
Irish Coding Standard	

Semi Private Bed

Variable	Semi Private Bed
Definition	Number of days patient spent in a semi private bed.
Definition source	ESRI HIPE Unit
Source	Hospital PAS
Collected since	2011 - migration to Portal.
Collected/Derived	Collected
Code Set	
Data Entry Guideline	
Variable Name	SEMIPRIVDAYS
Data Type	Integer
Field Size	3
Populated in National File	Y
<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>	
Reported by	Hospital
Reported for	All cases reported to HIPE.
Order in Instruction Manual	21
Irish Coding Standard	

Sex

Variable	Sex
Definition	The sex of the patient.
Definition source	ESRI HIPE Unit
Source	Hospital PAS
Collected since	pre-1990
Collected/Derived	Collected
Code Set	SEX
Data Entry Guideline	
Variable Name	SEX
Data Type	Integer
Field Size	1
Populated in National File	Y
<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>	
Reported by	Hospital
Reported for	All cases reported to HIPE.
Order in Instruction Manual	11
Irish Coding Standard	

Single Bed Days

Variable	Single Bed Days
Definition	The number of days a patient spends in a bed in a single occupancy room/ward.
Definition source	HPO HIPE Unit
Source	Hospital PAS
Collected since	2020
Collected/Derived	Collected
Code Set	
Data Entry Guideline	The midnight census can be used to determine the number of days spent in these environments. If the patient spends less than 1 day in these environments and is not present at the time of the midnight census, a stay of less than one day can optionally be recorded as '1' day.
Variable Name	SINGLEBEDDAYS
Data Type	Integer
Field Size	3
Populated in National File	Y
<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>	
Reported by	Hospital
Reported for	All cases reported to HIPE.
Order in Instruction Manual	22
Irish Coding Standard	

Source of Admission

Variable	Source of Admission
Definition	Describes where the patient was admitted from. It does not refer to where an emergency or accident occurred.
Definition source	ESRI HIPE Unit
Source	Hospital PAS
Collected since	2002
Collected/Derived	Collected
Code Set	ADMSOURCE
Data Entry Guideline	
Variable Name	ADMSOURCE
Data Type	Integer
Field Size	1
Populated in National File	Y
<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>	
Reported by	Hospital
Reported for	All cases reported to HIPE.
Order in Instruction Manual	5
Irish Coding Standard	

Time of Admission

Variable	Time of Admission
Definition	Time patient is admitted to ward.
Definition source	Casemix Technical Group
Source	Hospital PAS
Collected since	2012
Collected/Derived	Collected
Code Set	
Data Entry Guideline	Time (24 Hour)
Variable Name	ADMTIME
Data Type	Numeric
Field Size	4
Populated in National File	Y
<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>	
Reported by	Hospital
Reported for	All cases reported to HIPE.
Order in Instruction Manual	3a
Irish Coding Standard	

Time of Discharge

Variable	Time of Discharge
Definition	Time patient is discharged from hospital.
Definition source	Casemix Technical Group
Source	Hospital PAS
Collected since	2012
Collected/Derived	Collected
Code Set	
Data Entry Guideline	Time (24 Hour)
Variable Name	DISTIME
Data Type	Numeric
Field Size	4
Populated in National File	Y
<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>	
Reported by	Hospital
Reported for	All cases reported to HIPE.
Order in Instruction Manual	6a
Irish Coding Standard	

Transfer Admission Status

Variable	Transfer Admission Status
Definition	Indicates if the patient was a non-admitted patient (i.e. outpatient or ED) in the source hospital prior to the transfer where the patient was transferred into the current hospital.
Definition source	HPO HIPE Unit
Source	Hospital PAS
Collected since	2018
Collected/Derived	Collected
Code Set	1 = Non-Admitted in hospital transferring out, otherwise null
Data Entry Guideline	When ADMSOURCE is entered as 3 (transfer from acute hospital), HIPE Portal directs to TransAdmStatus section.
Variable Name	TransAdmStatus
Data Type	Integer
Field Size	1
Populated in National File	Y
<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>	
Reported by	Hospital
Reported for	Cases reported to HIPE where ADMSOURCE = 3 (transfer from acute hospital) and where the patient was a non-admitted patient in the source hospital prior to the transfer.
Order in Instruction Manual	5
Irish Coding Standard	

Transfer Hospital: From

Variable	Transfer Hospital: From
Definition	Hospital from which the patient was transferred.
Definition source	DoH
Source	Hospital PAS
Collected since	1994; updated 2020 ¹¹
Collected/Derived	Collected
Code Set	Hospital Code List
Data Entry Guideline	When ADMSOURCE is entered as 3 (transfer from acute hospital), Portal directs to TransInHosp question.
Variable Name	TransInHosp
Data Type	Integer
Field Size	4
Populated in National File	Y
<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>	
Reported by	Hospital
Reported for	All cases reported to HIPE where ADMSOURCE = 3 (transfer from acute hospital).
Order in Instruction Manual	5
Irish Coding Standard	

¹¹ Private hospitals and COVID 19 step down facilities were added in May 2020 and were made available for cases coded in 2020

Transfer Hospital: To

Variable	Transfer Hospital: To
Definition	Hospital to which the patient was transferred.
Definition source	DoH
Source	Hospital PAS
Collected since	1994; updated 2020 ¹²
Collected/Derived	Collected
Code Set	Hospital Code List
Data Entry Guideline	When DISC_CODE is entered as 03 (transfer to hospital – emergency) or 04 (transfer to hospital - non emergency), Portal directs to TransOutHosp question.
Variable Name	TransOutHosp
Data Type	Integer
Field Size	4
Populated in National File	Y
<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>	
Reported by	Hospital
Reported for	All cases where DISC_CODE is entered as 03 (transfer to hospital – emergency) or 04 (transfer to hospital - non emergency).
Order in Instruction Manual	7
Irish Coding Standard	

¹² Private hospitals and COVID 19 step down facilities were added in May 2020 and were made available for cases coded in 2020

Type of Admission

Variable	Type of Admission
Definition	The category of admission relating to this episode of care, indicates the priority of the admission.
Definition source	ESRI HIPE Unit
Source	Hospital PAS
Collected since	2002; amended 2009.
Collected/Derived	Collected
Code Set	ADMTYPE
Data Entry Guideline	Elective admissions to registered AMAUs/ASAU should not be reported to HIPE. Where a patient attends an AMAU/ASAU electively and goes home on the same day this is to be reported as outpatient activity.
Variable Name	ADMTYPE
Data Type	Integer
Field Size	1
Populated in National File	Y
<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>	
Reported by	Hospital
Reported for	All cases reported to HIPE.
Order in Instruction Manual	4
Irish Coding Standard	

Type of Elective Admission

Variable	Type of Elective Admission
Definition	Indicates if the elective admission is from a waiting list or is a planned admission.
Definition source	Casemix Technical Group/SDU
Source	Hospital PAS
Collected since	2013
Collected/Derived	Collected
Code Set	ElectiveType
Data Entry Guideline	Use code = 1 where patient's admission is planned. Use code = 2 if the patient's admission is from a waiting list. Use code = 3 if it is unknown whether a patient's admission is planned or from a waiting list.
Variable Name	ElectiveType
Data Type	Integer
Field Size	1
Populated in National File	Y
<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>	
Reported by	Hospital
Reported for	All cases reported to HIPE where ADMTYPE was 1 (elective) or 2 (elective readmission).
Order in Instruction Manual	4
Irish Coding Standard	

Ukrainian Temp Protection Flag

Variable	Ukrainian Temp Protection Flag
Definition	The Ukraine Temporary Protection Directive flag was introduced to capture patients treated in Irish hospitals who are in Ireland under the EU Temporary Protection Directive. The patients will be either Ukrainian or former residents of Ukraine.
Definition source	HPO
Source	Hospital PAS
Collected since	May 2022
Collected/Derived	Collected
Code Set	
Data Entry Guideline	This field will default to “No” and must be changed to “Yes” when a patient is covered by the Ukraine Temporary Protection Directive.
Variable Name	UUTPD
Data Type	Integer
Field Size	1
Populated in National File	Y
	<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>
Reported by	Hospital
Reported for	All cases reported to HIPE where a patient is covered by the Ukraine Temporary Protection Directive.
Order in Instruction Manual	34
Irish Coding Standard	

Waiting List Indicator

Variable	Waiting List Indicator
Definition	Is the case funded by the National Treatment Purchase Fund (NTPF) or “Access to Care” funding.
Definition source	ESRI HIPE Unit
Source	Hospital PAS
Collected since	2004; updated 2022
Collected/Derived	Collected
Code Set	WLIST
Data Entry Guideline	
Variable Name	WLIST
Data Type	Integer
Field Size	1
Populated in National File	Y
<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>	
Reported by	Hospital
Reported for	All cases reported to HIPE where ADMTYPE was 1 (elective) or 2 (elective readmission).
Order in Instruction Manual	4
Irish Coding Standard	

1st-29th Additional Diagnosis

Variable	1st-29th Additional Diagnosis
Definition	A condition or complaint either coexisting with the principal diagnosis or arising during the episode of admitted patient care. Interpreted as conditions that affect patient management.
Definition source	10th ed ICD-10-AM/ACHI/ACS and ICS
Source	Chart
Collected since	1 st -19 th additional diagnosis collected since 1990. Name change 2011, formerly C2DIA-C9DIA (1 st -8 th additional diagnosis) and CaDIA-CkDIA (9 th -19 th additional diagnosis). 20 th -29 th additional diagnosis collected since 2011.
Collected/Derived	Collected
Code Set	10th ed ICD-10-AM/ACHI/ACS and ICS
Data Entry Guideline	
Variable Name	DIAG2-DIAG30
Data Type	Alphanumeric
Field Size	5
Populated in National File	Y
<i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>	
Reported by	Hospital
Reported for	All cases where an additional diagnosis (1 st -29 th) was made.
Order in Instruction Manual	
Irish Coding Standard	

1st-29th Additional Diagnosis Consultant

Variable	1st-29th Additional Diagnosis Consultant
Definition	Consultant attending 1 st -29 th additional diagnosis.
Definition source	ESRI HIPE Unit
Source	Chart
Collected since	1 st -19 th additional diagnosis consultant collected since 1990. Name change 2011, formerly C2CON-C9CON (1 st -8 th additional diagnosis consultant) and CaCON-CkCON (9 th -19 th additional diagnosis consultant). 20 th -29 th additional diagnosis consultant collected since 2011.
Collected/Derived	Collected
Code Set	
Data Entry Guideline	
Variable Name	DIAGCONS2-DIAGCONS30
Data Type	Alphanumeric
Field Size	4
Populated in National File	Y - encrypted <i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>
Reported by	Hospital
Reported for	All cases where an additional diagnosis (1 st -29 th) was made.
Order in Instruction Manual	
Irish Coding Standard	

1st-19th Additional Procedure

Variable	1st-19th Additional Procedure
Definition	Clinical intervention that is surgical in nature and/or carries a procedural risk and/or carries an anaesthetic risk and/or requires specialised training and/or requires special facilities or equipment only available in an acute care setting.
Definition source	10th ed ICD-10-AM/ACHI/ACS and ICS
Source	Chart
Collected since	1990. Name change 2011, formerly P2PRO-P9PRO (1 st -8 th additional procedure) and PaPRO-PkPRO (9 th -19 th additional procedure).
Collected/Derived	Collected
Code Set	10th ed ICD-10-AM/ACHI/ACS and ICS
Data Entry Guideline	The order of procedures is determined by the following hierarchy: procedure performed for treatment of principal diagnosis, procedure performed for treatment of an additional diagnosis, diagnostic/exploratory procedure related to principal diagnosis, diagnostic procedure related to additional diagnosis.
Variable Name	PROC2-PROC20
Data Type	Integer
Field Size	7
Populated in National File	Y <i>(If no, this variable is only populated in the hospital version of HIPE and is not available across hospitals)</i>
Reported by	Hospital
Reported for	All cases where an additional procedure (1 st -19 th) was performed.
Order in Instruction Manual	
Irish Coding Standard	

1st-19th Additional Procedure Anaesthetist

Variable	1st-19th Additional Procedure Anaesthetist
Definition	Consultant anaesthetist responsible for anaesthetics in 1 st -19 th additional procedure.
Definition source	ESRI HIPE Unit
Source	Chart
Collected since	01 Sep 2008. Name change 2011, formerly P2ANA-P9ANA (1 st -8 th additional procedure anaesthetist) and PaANA-PkANA (9 th -19 th additional procedure anaesthetist).
Collected/Derived	Collected
Code Set

Appendix I - CODE SETS

ADMSOURCE - Source of Admission

Code	Description
1	Home
2	Transfer from nursing home/convalescent home or other long stay accommodation
3	Transfer of admitted or non-admitted patient from Hospital or Covid -19 facility in Hospital code list or transfer from any Acute Hospital not specified in Hospital Code Listing
4	Transfer from Non-Acute Hospital
5	Transfer from hospice
6	Transfer from psychiatric hospital/unit
7	New born
8	Temporary place of residence (e.g. hotel)
9	Prison
0	Other

ADMTYPE - Type of Admission

Code	Description	Definition
1	Elective	The patient's condition permits adequate time to schedule the availability of suitable services, an elective admission can be delayed without substantial risk to the health of the individual.
2	Elective Readmission	Patient admitted electively to the same hospital where they had previous treatment/care to continue ongoing treatment or care.
4	Emergency	The patient requires immediate care and treatment as a result of a severe, life threatening or potentially disabling condition. Generally the patient is admitted through the Emergency Department.
5	Emergency Readmission	This is an unscheduled readmission following previous spell of treatment in same hospital and relating to the treatment or care previously given.
6	Maternity	The patient is admitted related to their obstetrical experience. (From conception to 6 weeks post delivery).
7	New born	Neonate (0 - 27 days old) admitted to hospital for care or observation as an emergency or unplanned.

DAYCASE

Code	Description
0	In-patient
1	Day case

DISC_CODE – Discharge Code

Code	Description
00	Self discharge
01	Home
02	Nursing home, convalescent home or long stay accommodation
03	Emergency Transfer to Hospital in Hospital Code Listing or transfer to any Acute Hospital not specified in Hospital Code Listing
04	Non Emergency Transfer to Hospital in Hospital Code Listing, or Covid-19 facility, or transfer to any Acute Hospital not specified in Hospital Code Listing
05	Transfer to psychiatric hospital/unit
06	Died with post mortem
07	Died no post mortem
08	Emergency Transfer to Non-Acute hospital
09	Non Emergency Transfer to Non-Acute hospital
10	Transfer to rehabilitation facility
11	Hospice
12	Prison
13	Absconded
14	Other (e.g. Foster care)
15	Temporary place of residence (e.g. hotel)

DISCHARGEMODE – Discharge Mode

Code	Description	Definition
1	Acute Care	Follow-on care where there is an acute length of stay following an acute length of stay. For example, a patient is transferred from your hospital to another hospital for continuing acute care.
2	Rehabilitation Care	Care in which the primary clinical purpose is improvement in the functioning of a patient with an impairment, activity limitation or participation restriction due to a health condition. For example, a patient is transferred to a specific facility for rehabilitation following a surgical intervention.
3	Palliative Care	Care in which the primary clinical purpose or treatment goal is the optimisation of the quality of life of a patient with an active and advanced life-limiting illness. For example, a patient is transferred to a facility for the provision of Palliative Care following a terminal diagnosis.
4	Convalescence/ Step Down Care	Care in which the primary clinical purpose or treatment goal is support for a patient with impairment, activity limitation or participation restriction due to a health condition where there is an expectation that the patient will be subsequently discharged home.
5	Long Term/Nursing Care	Care in which the primary clinical purpose is to support the functioning of a patient who can no longer live independently.
6	General Psychiatric Care	Care in which the primary clinical purpose is improvement in the functional status, behaviour and/or quality of life of a patient with significant psychiatric or behavioural disturbance.

7	Other Care	Further care that is not covered by the other options.
9	Unspecified/ Unknown Care	Care where the intention of the care is not known or not recorded.

DIS_STATUS – Discharge Status

Code	Description
1	Public
2	Private
